

Chatify

Chatify is a service that combines Spotify with the power of social features such as splitting off each artist page on Spotify into social channels where users can talk to each other not available on Spotify.

Users of Spotify might find themselves not able to connect with people with similar music tastes as them, and Chatify's service has the ability to connect such people in a streamlined manner. You won't find yourself confused about how to get your opinion on a new track and with the ability of making your own channels, you can start forming communities based on whatever you want to base your community on.

The Listener

The listener will find a lot of value in being able to find people like them in their favorite artist channels and will find a sense of community quickly!

The Artist

Having the ability to connect with their audience in an open fashion will empower artists to connect and have avenues to get more exposure!
